I am writing to express my strong interest in the internship program at Innowise. As a self-taught developer currently transitioning into the IT sector, I am highly motivated to apply my skills in JavaScript and React within the Microsoft ecosystem, specifically for the SharePoint Developer or GenAI Low-Code track.

Why I believe I am a strong candidate for this role:

- **Technical Foundation:** Since 2023, I have been dedicated to an intensive self-study path, focusing on JavaScript, React, HTML5, and CSS3. I understand the core logic of programming and how web applications interact with data.
- **Problem-Solving & Responsibility:** For 3 years, I ran my own business in Spain (Gandia), managing luxury holiday properties. This experience taught me high responsibility, technical troubleshooting (maintenance/repairs), and the ability to work independently under pressure.
- **International Communication:** My background in international customer service has shaped my communication skills and cultural awareness, and my English (B2) allows me to work effectively in a global environment.
- **Growth Mindset:** I am not afraid of "manual work" or complex systems. I value the low-code approach because it focuses on results and system design, which aligns with my pragmatic approach to technology.

I am eager to participate in both stages of the internship and prove my value during the paid phase. I have attached my CV with links to my GitHub portfolio and I am ready for the tech-check to verify my current knowledge.

Thank you for your time and consideration.
